

Masslinn® Dry Dusting system
Disposable impregnated wipe

Mechanical cleaning equipment
Auto scrubber, or single disc machine
SC 430/Viper LS160

3M Mechanical cleaning pads
3M Red/Blue or Melamine pad
Blue is only used on the post installation clean !!

Manual washing equipment
Vileda or Twice Microfibre mopping system

— On interlocking (Clic), removable (X'Press) and loose lay (Saga²) products, don't allow the solution to dwell.

	Equipment used	Cleaning products	Cleaning methods
<p>First use-Post Installation clean</p> <p>Mechanical cleaning</p>	 or if soiled	Alkaline detergent Proflex	<ul style="list-style-type: none"> Damp sweeping Auto Scrubber or single disc (low speed) (with water recovery) All residues needs to be sucked up via the auto or with an wet and dry vac
<p>Daily cleaning</p> <p>Manual cleaning</p> <p>OR</p>	 	Neutral detergent Progen or Proclean	<ul style="list-style-type: none"> Damp sweeping Manual washing with flat mop Rinsing
<p>Mechanical cleaning</p>	 or 3M Melamine	Neutral detergent -only with manual machinery(Single disc) Progen or Proclean Proflex through auto scrubber(If the area is large enough or requires it !)	<ul style="list-style-type: none"> Damp sweeping Mechanical washing at 300-450 rpm (with water recovery)
<p>Deep cleaning</p> <p>Mechanical cleaning</p>	 or 3M Melamine	Alkaline detergent Proflex	<ul style="list-style-type: none"> Damp sweeping Mechanical washing at 300-450 rpm (with water recovery)

[These cleaning instructions have to be adapted depending on traffic and location of the area!!](#)

In the case of manual maintenance and to offer you the best results in terms of hygiene and appearance, Gerflor recommends that you use Progen or Proclean and Proflex (As the problem solver)

The 3M Melamine pad is an problem solving pad utilised when you are not getting the required results with the 3M Red pad

Here is a non-exhaustive list of products recommended by the main manufacturers:

Industroclean:

- * Progen
- *Proclean
- **Proflex
- * Neutral/ **Alkaline

PRECAUTIONS FOR USE

- Never use a 3M Black stripping pads or 3M Blue cleaner pads or any procedure/non approved chemical that risks damaging the surface treatment (abrasive products, solvents, etc)
- Never use rubber caps (for chair legs or other furniture) instead, use PVC or Polyethylene caps

STAIN REMOVAL DURING WORKS

Paint mark removal

- Do not use abrasive cleaning equipment (e.g. Scouring pads, steel wool, etc.).
- Use the solvent for the paint if known but do a small test patch to see results. If the solvent is not known, start with solvents such as White Spirit etc before trying stronger solvents
- If the stain proves hard to remove, do not persist ask Industroclean for assistance
- Wipe and rinse the floor thoroughly after applying the solvent

On paint drips

- A freeze spray (Pro Frost) will yield excellent results when paint has formed a drip on the material (freeze sprays can be bought from Industroclean)

On adhesive marks

- Fresh acrylic adhesive marks (1 month)
Apply a water-based solution with added cleaning product, leave to act and mechanically clean and rinse the floor.
- Dried acrylic adhesive marks (1 month)
Use White Spirit. Wipe and rinse the floor thoroughly after applying the solvent
- Solvent adhesive marks
Use strong solvents (such as Prostrip, but do not persist if the adhesive marks are difficult to remove (as may happen with solvent-resistant cross-linked adhesives)

TIPS AND ADVICE FOR STAIN REMOVAL

Rust

Apply oxalic acid. Rinse thoroughly

Food grease/paint/ballpoint pen/felt-tip pen/heavy grease (tar)

Apply a alkaline detergent such as Prosolve/Proflex. Rub with undiluted product and rinse with plenty of water

Rubber marks/Shoe marks

Apply an alkaline detergent (Prosolve) to shoe marks. Leave to act for 5 minutes then rub

Chewing-gum

Use a freeze spray(Pro Frost) to harden the chewing gum, and then remove it with a plastic spatula (freeze sprays can be bought from Industroclean)

- Never use a 3M Black stripping pad/any procedure/non approved chemical that risks damaging the surface treatment (abrasive products, solvents, etc)
- No sealing of the floor

Initial deep clean prior to client handover /maintenance & Deep cleaning

All dust and grit to be vacuumed/swept up prior to applying any chemical solution !!

Post Installation & Periodic/Deep Cleaning

- All dust, sand and stones must be removed prior to scrubbing. This can be done with either a vacuum cleaner or by sweeping with disposable cloths such as Masslinn®
- Scrub the floor using a solution of a neutral detergent such as Proclean or Alkaline product like Proflex (Depending on the soiling) diluted according to manufacturers instructions, with a Low Speed Scrubber fitted with a 3M Red or Melamine pad . For detail work, use an edge cleaning tool with red pad
- Vacuum the dirty Proclean/Proflex solution from the floor with a Wet & Dry Vacuum Cleaner. The floor should be thoroughly rinsed with clean water to remove any remaining chemical residue

Daily Maintenance:

- Dust with a disposable cloth system such as Masslinn® Tool and Masslinn® Cloths
- Spot mop wet sticky dirt with a Vileda double/single bucket mopping unit with the correct dilution of neutral detergent such as Progen or Proclean For optimal results, make sure that the rinsing water is changed regularly
- For larger areas, wash the floor using a Nilfisk Automatic Scrubber-Drier, 3M Red Buffing Pad and alkaline detergent such as Proflex

Deep cleaning

The floor may require periodic scrubbing in high traffic areas. In such cases, follow the aforementioned Post Installation and

Periodic / Deep Cleaning guidelines

Cleaning of Equipment:

- All equipment should be cleaned thoroughly after use
- Pads should be rinsed or vacuumed depending on soiling
- Single disc machines must be wiped with a damp cloth and disinfectant if needed

Please feel free to contact me for assistance and I will be able to guide you through the process or put you in contact with a contract cleaner for once-off post installation cleaning or monthly contractual maintenance

Kind Regards,
Sean Harms
